## DETAILED ACTION

### *Claim Rejections - 35 USC § 101*

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 9-17 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

The claims are directed to a program per se. While the program contains functionally descriptive material the recording of the functionally descriptive material on some computer-readable medium, which would enable the functionality to be realized, fails to be recited.

Relative to claim 17 the recitation of a "machine-readable media" is not sufficient because lines 23-28 calls for the computer-readable medium to include "any other suitable medium" which would include a transmission/communication medium.

### *Claim Rejections - 35 USC § 112*

2. Claims 3, 8-17, 19 and 20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The phrases "the additional component multiplier", claim 3, line 2 and "the memory circuitry" claims 19 and 20; lack clear antecedent basis. Line 2 of claim 8 is grammatically incorrect. Claims 9 and 17 are incomplete because they call for summing a plurality of partial products but the generation of the partial products fails to be recited. Claim 10 is inconsistent

Art Unit: 2193

with claim 9 because the function attributed to the “programmable logic circuitry” by claim 10 fails to fall within the scope of the “programmable logic circuitry” as defined by claim 9.

***Allowable Subject Matter***

3. Claims 1, 2, 4-7 and 18 are allowed.

***Conclusion***

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to David H. Malzahn whose telephone number is (571) 272-3727.
